

AFFINITY FINANCE

Affinity Finance offers an integrated sales ledger and standard configuration simplifying all finance processes including direct debit instruction and collection management, credit control and ledger activity tracking. Visibility of customer accounts ensures transparency of costs throughout the finance cycle and it can even create one off reseller branded invoices and credits. Custom processes are also easy to configure ensuring you stay on top of cash flow and customer payments.

FUNCTIONALITY

INTEGRATED SALES LEDGER - STANDARD CONFIGURATION

- Ability to create one off invoices and credits from within the system - reseller branded
- Simplified collections and DD processes using existing DD file templates
- Reminder letter templates for debt management
- Ability to use outstanding balance information across the system
- Share information through the system for greater visibility of customer accounts to managers and staff
